Ever since the first Land Rover was conceived in 1947, we have built vehicles that challenge what is possible. These in turn have challenged their owners to explore new territories and conquer difficult terrains. Our vehicles epitomise the values of the designers and engineers who have created them. Each one instilled with iconic British design cues, delivering capability with composure. Which is how we continue to break new ground, defy conventions and encourage each other to go further. Land Rover truly enables you to make more of your world, to go above and beyond.

DESIGN

EXTERIOR

Range Rover Evoque has defined the compact SUV. Its design cues – striking lines, muscular shoulder and tapered roof – have become synonymous with style and contemporary city life. Now the vehicle is going even further. Available in HSE Dynamic and HSE Dynamic LUX models, new Range Rover Evoque Convertible, the world’s first premium compact convertible SUV, sets new standards in design, capability and sheer driving pleasure.

Optional adaptive full LED headlamps complement the vehicle’s design cues by combining a distinctive look with enhanced light output for better visibility and safety at night. The headlamps’ adaptive function enable light beams to be automatically aligned with steering inputs and follow curves in the road.

The Daytime Running Lights have a distinctive signature, which also serve as the directional indicator by flashing amber.

CONVERTIBLE ROOF

The vehicle utilises a fabric Z-Folding Convertible Roof System in Ebony. It is electrically operated, with opening and closing being easily controlled via a switch mounted in the centre console; an action that can be completed whilst the vehicle is travelling up to 30mph.

The roof is available in Ebony which complements the complete colour palette. The roof has an acoustic inner lining to reduce road noise and also to provide insulation to the cabin.

The tailgate has been developed to allow easy access to the loadspace. The loadspace capacity remains unchanged regardless of the roof position and is able to accommodate a standard golf bag, or a baby buggy.

INTERIOR

A range of individual features provide added appeal to the clean, architectural shapes of the vehicle's interior. The front seats incorporate the latest technologies such as climate control options, heated and cooled seats, to ensure a truly relaxed and comfortable ride. Whilst the use of premium materials such as Oxford leather and twin-needle stitching ensure a comfortable journey for all four passengers.

The InControl Touch Pro infotainment system allows music to be heard and felt the way it should. Bright trebles. Deep bass notes. Rich tones that let every instrument sing. These are the characteristics of the Meridian™ Sound System.

Added to which, the vehicle's 10.2 inch Touch-screen has phone connectivity for two phones simultaneously and allows access to the vehicle's Bluetooth® streaming.

When the roof is down, an optional* wind deflector system will add to front seat comfort by reducing draughts from the rear of the cabin. The wind deflector is easily stored and can therefore be readily deployed.

An optional* Ski Hatch allows through loading of skis and other long loads from the loadspace into the passenger cabin. This feature also includes a rear centre armrest.

*Standard on HSE Dynamic LUX models.

All interior images shown are Ebony/Ebony with Lunar contrast stitch.

Meridian is a registered trademark of Meridian Audio Ltd. The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Land Rover is under license.

TERRAIN RESPONSE

Land Rover has always been synonymous with capability and Range Rover Evoque Convertible lives up to even the most demanding expectations. Confident and responsive, the drive is further enhanced by a generous wheel articulation and innovative off-road technologies such as Terrain Response, which is standard.

This feature adapts to the responses of the vehicle's engine, transmission, differentials and chassis systems to maximise driveability, comfort and traction. There are four Terrain Response settings: General Driving, Grass/Gravel/Snow, Mud & Ruts and Sand. So, the vehicle feels sure-footed no matter what the terrain or weather conditions.

ALL-TERRAIN PROGRESS CONTROL

All-Terrain Progress Control is an optional state-of-the-art new system that enables drivers to set and maintain a steady speed in challenging conditions. Operating like a cruise control system, it functions at very low speeds between 1mph and 18mph, helping the driver to maintain full concentration on steering and finding a path through obstacles.

The system is enhanced by a dedicated Launch feature, which enables the vehicle to pull away smoothly and easily, even on tricky low-friction surfaces like ice, sand or wet grass. Developed by Land Rover's industry-leading all-terrain specialists, the system requires no additional hardware or sensors, and works seamlessly alongside the standard Terrain Response and four-wheel drive traction and braking systems. Once All-Terrain Progress Control is activated, the standard steering wheel +/- cruise control buttons are used to set the speed. Brake and accelerator pedals can still override the chosen settings, with gentle braking achieving a reduction in speed.

WADE SENSING

This optional* feature operates when the vehicle is going through water. Sensors in the door mirrors provide real-time information of water depth which is presented on the Touch-screen along with the vehicle's maximum wading capability of 500mm.

HILL DESCENT CONTROL

Land Rover's patented Hill Descent Control (HDC) is a standard feature that assists the driver with controlled descents of difficult slopes by maintaining a constant speed and applying braking separately to each wheel.

Hill Start Assist ensures the vehicle doesn't roll backwards as it pulls away on an incline.

The vehicle also utilises **Gradient Release Control (GRC)** which is designed to prevent the vehicle accelerating too quickly on a steep incline when the driver inadvertently releases the brake.

*Only available with Surround Camera System and Blind Spot Monitor.

ACTIVE DRIVELINE

Optional Active Driveline* delivers benefits in both on and off-road situations. In many on-road driving conditions, the system is able to disconnect drive to the rear of the vehicle, providing maximum two-wheel drive fuel economy. A sophisticated control strategy continuously monitors key vehicle and environmental parameters. If the requirements for four-wheel drive are met, the system seamlessly and imperceptibly reconnects that drive within 300 milliseconds.

TORQUE VECTORING

When cornering, the vehicle’s agility and stability are enhanced by the new **Torque Vectoring** system. Monitoring the vehicle, this system constantly balances the distribution of torque between all the wheels to improve grip and steering whether on or off-road.

MERIDIAN™ SOUND SYSTEMS

Land Rover has partnered with Meridian, a world leader in high performance audio technologies and digital sound processing to develop advanced audio systems for Range Rover Evoque Convertible. Dynamic Volume Control technology has also been integrated on both systems, to ensure that any unwanted noise detected in the cabin will be smoothly and automatically balanced out.

The standard 380W Meridian Digital Sound System features 10 loudspeakers and a dual-channel subwoofer, delivering exceptional definition, crystal clear highs and full, deep bass through the careful arrangement of speakers.

Range Rover Evoque Convertible also offers an optional* upgrade, the Meridian Digital Surround Sound System, which produces 660W through 12 loudspeakers and a dual-channel subwoofer. This system also includes Meridian Trifield technology. This technology delivers the very best in world-class audio reproduction, bringing you closer to the original performance regardless of your position in the vehicle; everyone will feel and hear pure musical enjoyment.

*Standard for HSE Dynamic LUX models.
Meridian is a registered trademark of Meridian Audio Ltd.

HEAD UP DISPLAY

Head Up Display is a technology option* that presents key vehicle data such as current speed, gear position and navigation directions on the windscreen, without distraction or the need for the driver to take their eyes off the road. In a world first, the Land Rover system features laser holographic techniques, resulting in superior colour saturation, brightness and contrast.

This innovative laser system is more robust against issues such as ‘washout’ – the effect that the glare from sunlight has on inferior LED-based systems. The display can be turned on and off dependent upon driver preference.

*Must be selected with solar attenuating windscreen option. Speed limit indication features when optional Traffic Sign Recognition is selected.

COMFORT FOR ALL

SEATING

All models feature Oxford Perforated leather seats as standard, as well as 12-way electric memory and lumbar support on both driver and front passenger seats. Heated front seats come as standard and can be individually controlled.

For the ultimate comfort climate front seats are also available. This option provides both heated and cooled ventilation through the standard Oxford Perforated leather seats. To complement this function, optional front massage seats* allow both the driver and front passenger to select from five settings via the Touch-screen.

CONFIGURABLE MOOD LIGHTING

HSE Dynamic and HSE Dynamic LUX models feature, as standard, Configurable Mood Lighting which is controlled via the vehicle's Touch-screen, with a choice of ten colours available. The brightness of the mood lighting is also configurable, and a 'Stealth' setting is available to reduce cabin illumination to a minimum. Create the mood. Enjoy the surroundings. Get more out of the drive.

*Front massage seats require optional 14-way electric seats and front climate seats.

LAND ROVER INCONTROL

InControl is our suite of advanced technologies that link both you and your Range Rover Evoque Convertible to the wider world. It helps you maintain your important digital connections, and links you seamlessly and securely with your vehicle when you are elsewhere.

INCONTROL TOUCH PRO

The InControl Touch Pro infotainment system is quick, intuitive and can be adapted to suit your individual needs.

The key aspects of InControl Touch Pro are:

- A **10.2 inch Touch-screen** comes as standard and it responds in the same manner as a smartphone or tablet computer, providing multi-touch gestures such as pinch to zoom, and swipe. It features a customisable home screen so your favourite widgets can be at your fingertips, and its interactive side panel makes multi-tasking easy.
- **InControl Touch Pro Navigation** comes as standard on all models. The guidance system is intelligent enough to determine where you might want to go even if you misspell a destination, or do not know the complete address. The fully integrated navigation system uses 'Dead Reckoning' to accurately pinpoint the position of your vehicle in order to ensure appropriate guidance and avoid confusion, particularly useful in tunnels or built up areas.

INCONTROL PROTECT

InControl Protect is a package of features offered as standard. It provides safety and security both when you are in and away from your Range Rover Evoque Convertible.

- **SOS Emergency Call** automatically sends your location to, and puts you in contact with, the emergency services if the airbags deploy following an accident. An emergency call can also be manually activated.
- **Breakdown Call** provides assistance at the touch of a button by putting you in contact with the recovery service and transmitting key vehicle information, location, and certain diagnostics for a rapid response.
- **Remote Essentials** is an application that allows you to monitor your vehicle remotely from your smartphone, giving you vital information and statistics about your vehicle, including fuel levels, range, and journey tracking.

INCONTROL SECURE

For ultimate peace of mind, the standard InControl Secure provides stolen vehicle tracking. This feature detects any unauthorised movement of your Range Rover Evoque Convertible and alerts you. Then, working with the authorities, provides information to them to pinpoint the vehicle's location and assist in its return.

INCONTROL CONNECT PRO

InControl Connect Pro is a standard package of technologies and applications on HSE Dynamic and HSE Dynamic LUX which give you the very best in connectivity and convenience. It offers the following features:

- **InControl Remote Premium** is a multi-function app that allows you to monitor as well as interact with your Range Rover Evoque Convertible. Remote start the engine to set your desired temperature, lock and unlock the vehicle, locate your vehicle on a map or by using the beep and flash function, and track your journeys – all via the app from your smartphone.
- **InControl Apps** features a range of bespoke Land Rover approved apps that can be connected to the car from your smartphone. It ensures the safe and convenient use of apps that have been optimised specifically to enhance aspects of your in-vehicle experience.

- **InControl Pro Services** are a range of connected features which includes the following:
- **Wi-Fi Hotspot** gives you the option to create a 3G hotspot using the vehicle's antenna when you fit a SIM card. This strengthens your link to the outside world, for a more stable connection than an individual device could maintain. Connect up to eight devices to read emails, browse the web and download content.
- **Route Planner Companion App** offers true door-to-door navigation. Pre-plan your destination and route via your Apple or Android smartphone and then your selected route will be available on the vehicle's Touch-screen. When you've completed your road journey, the app can guide you by foot or public transport (where supported) to your destination.
- **Live** services provide a range of up-to-the-minute information including news, weather, local fuel prices and flight tracking. Live services can be updated throughout the life of your vehicle.

- **Commute Mode** enables the vehicle to learn your daily commute and automatically advises you of the expected journey time, based on live traffic movements, for the different learned routes you use for that journey.
- **Arrival Mode** displays interactive 360 degree street level imagery of your destination for seamless journey arrival. It is automatically displayed again when you are approximately 200m from arrival to help you identify your destination. Especially useful when building numbers are not visible.
- **Arrival Mode Parking** displays parking availability and pricing close to your destination (where supported). Simply tap on the desired car park to select it as an updated destination.

Please consult your nearest Land Rover Retailer for further details.
Certain features require the fitment of a Micro SIM with a suitable data contract.

BUILD YOUR OWN

INGENIUM DIESEL ENGINE

The all-new Ingenium diesel engine delivers a step change in both emissions and economy.

The 2.0 litre four-cylinder Ingenium engine has the power output of 180hp and comes with four-wheel drive as standard.

Land Rover engineers have paid particular attention to reducing weight while maintaining excellent strength and high levels of refinement.

An efficient solenoid common-rail system feeds fuel into the combustion chambers which provides precision injection with low noise levels. Added to which internal friction is reduced by up to 17 percent compared with the previous generation turbodiesel engine, boosting efficiency, smoothness and responsiveness.

Not only is the new Ingenium engine substantially lighter, more fuel-efficient and more refined than its predecessor, it is also more affordable and convenient to own thanks to servicing intervals extended from 16,000 to 21,000 miles (or every two years, whichever comes first).

Si4 PETROL ENGINE

The Si4 petrol engine is a lightweight all-aluminium 2.0 litre 240hp engine with four-wheel drive as standard. It comes with the latest direct-injection technology, advanced turbocharging and twin independent variable valve timing to help lower fuel consumption and CO₂ emissions compared with traditional larger capacity engines delivering equivalent performances.

The engine delivers a rich, powerful engine sound during strong acceleration and features a unique exhaust manifold for

quicker warm-up and lower emissions, a low friction design and a state-of-the-art electronic management system.

This includes Smart Regenerative Charging, which prioritises the charging of the battery when the vehicle is decelerating to capture wasted kinetic energy and reduce fuel consumption.

Si4 service interval remains at 16,000 miles/1 year.

NINE-SPEED AUTOMATIC

The Range Rover Evoque Convertible's nine-speed automatic transmission is one of the most efficient and technically advanced transmissions ever used in a production vehicle.

Smaller ratio steps give improved response during acceleration, plus improved shift quality, drive and refinement. The higher top gear not only reduces fuel consumption

but the lower engine revs also improve comfort and reduce noise when cruising at a sustained speed. The nine-speed automatic transmission is extremely robust and perfectly complements Land Rover's rugged all-terrain ability whilst delivering exceptionally high levels of refinement and efficiency.

BUILD YOUR OWN

SAFETY

As with every Land Rover safety was a key priority in the development of Range Rover Evoque Convertible. In all models, all seating positions are assessed to ensure a high standard of occupant protection as well as a comprehensive occupant safety package including driver and passenger airbags, driver knee airbags, and side airbags - seat mounted with head protection. Furthermore the twin rear seats include ISOFIX as standard.

ADVANCED DRIVER ASSISTANCE

BLIND SPOT MONITORING*

Blind Spot Monitoring is packaged with Reverse Traffic Detection. Designed to see what might be missed, these optional systems have discrete sensors hidden in the side and rear bumpers. When a vehicle enters a blind spot on either side of the vehicle, Blind Spot Monitoring alerts the driver via an icon displayed in the appropriate door mirror. If a vehicle approaches at speed from behind when changing lanes, the driver will be alerted by a flashing icon in the door mirror.

Activated whilst reversing, Reverse Traffic Detection works by informing the driver in the event of a vehicle approaching from either side which may present a hazard, with both audible and visual warnings.

*Standard on HSE Dynamic LUX.

LANE KEEPING ASSIST*

Optional Lane Keeping Assist is packaged with Autonomous Emergency Braking and Driver Condition Monitor. It uses the forward facing camera to detect lane markings ahead of the vehicle. If it detects that it is getting too close to either side of its lane, the system will counter-steer to keep the vehicle in lane. When the driver activates the turn signal to intentionally change lanes or turn, the function does not intervene.

Autonomous Emergency Braking will warn the driver when a collision with another car is imminent and deploy the brakes to mitigate a collision if the driver doesn't respond in time. This feature works up to 50mph.

Driver Condition Monitor helps detect the onset of drowsiness. If detected, a warning message is displayed to prompt the driver to take a break.

DEPLOYABLE ROLLOVER PROTECTION DEVICE (RPD)

In order to provide a high level of rollover protection to vehicle occupants, whilst retaining a clean visual appearance to the vehicle in normal use, deployable rollover protection devices are fitted behind the rear seats as standard. In the unlikely event of a detected rollover situation, these devices will deploy.

BUILD YOUR OWN

TRAFFIC SIGN RECOGNITION*

Working in conjunction with the Navigation System, this optional feature scans the road ahead for certain traffic signs and displays them in the Message Centre in the instrument pack. The following signs are detected: speed limit signs, no-overtaking signs, variable overhead speed signs and traffic signs with extra information – such as reduced speeds for wet roads.

The system can be configured to provide speed alert warnings when the vehicle is travelling at or above the current speed limit, as well as warning of no-overtaking zones.

*Standard on HSE Dynamic LUX.
**Only available for Si4 models.

PARK ASSIST / PARALLEL PARK / PARKING EXIT / PERPENDICULAR PARK*

Park Assist consists of Parallel Park and Parking Exit. Using sensors, this optional feature identifies parking spaces and helps to parallel park in tight spots. The screen prompts the driver to select reverse and then automatically steers the vehicle into place. The driver stays in control using the brake and graphics in the instrument panel to guide through each manoeuvre.

Parking Exit provides the same assistance to manoeuvre out of the space.

Perpendicular Park is truly useful in car parks and tight spaces, it automatically assesses whether the chosen space is wide enough before steering the vehicle centrally into place.

ADAPTIVE CRUISE CONTROL

Optional** Adaptive Cruise Control (ACC) is a radar based cruise control system that helps maintain a pre-set gap from the vehicle in front, even if it changes speed.

Queue Assist uses ACC technology to follow the vehicle in front in traffic queues. It will bring the vehicle to a halt when necessary.

Intelligent Emergency Braking uses radar to detect vehicles travelling in the same direction. If the system calculates that a frontal collision is imminent, it can fully deploy the brakes to mitigate a frontal collision. This feature works up to 50mph.

DRIVELINE, ENGINE PERFORMANCE AND FUEL ECONOMY

The all-new Ingenium diesel engine is fully EU6 compliant, and is coupled with lightweight all-aluminium construction and nine-speed automatic transmission. This delivers greatly improved fuel efficiency and lower CO₂ emissions.

The Si4 petrol engine is also fully EU6 compliant, yet has lost nothing in performance, accelerating from 0-60mph in just 7.8 seconds.

All engines feature Intelligent Stop/Start technology, automatically shutting down the engine at rest when possible, and re-starting it again as soon as you lift your foot off the brake.

LAND ROVER ACCESSORIES

Range Rover Evoque Convertible is so capable and adaptable it can get straight to work across a huge variety of vastly differing conditions and roles. Even so, some owners want to add their own stamp of individuality by tailoring their Range Rover Evoque Convertible to their specific needs with a range of stylish, practical accessories that are tough, versatile and bring an opportunity for personalisation.

Importantly, these accessories can be added at any stage during the vehicle's life – not just when it's new. Naturally, Land Rover approved accessories are designed, tested and manufactured to the same exacting standards as the original equipment fitted to your vehicle.

A WORLD OF LAND ROVER

Ever since its inception, Land Rover has been ready for anything. Its legendary capability has seen it tackle the most demanding of terrains, in the most difficult conditions. Its versatile interior has become synonymous with comfort and greater loadspace. And its ‘can do’ attitude has made it the most welcome of vehicles across the globe.

You can be part of the Land Rover story at one of our Land Rover Experience centres. You can see how each and every one of these iconic vehicles is built. You can take one out onto off-road tracks where your driving skills will be put to the test. Or you can go even further on one of our Adventure Travel holidays to such countries as Tanzania, Iceland or Morocco. Adventure awaits.

BEHIND THE SCENES TOURS

Ever wanted to discover how your Land Rover was built? To see the incredible journey upon which each and every one of our vehicles travels before you receive it?

You can experience how it is created using state-of-the-art technologies, the most efficient processes, the finest materials and British Craftsmanship at our facilities around the world.

From on-demand ordering of parts, to final trim and quality tests, the entire process will come to life before your eyes. It’s a truly impressive display of engineering, craft and precision; one that you can then physically enjoy by taking a vehicle out onto one of our Experience Drives.

EXPERIENCE DRIVES

Wading through mud. Crossing a Tipping Bridge. Or creeping down a slippery, steep decline. Our Experience centres have an array of obstacles and challenges to tax even the most accomplished of drivers.

Our experts will teach you how to navigate through some of the most demanding terrain. Then, you can take the skills that you have learned and use them when you drive every day.

There's a choice of courses from Taster Drives through to Full Day Experiences, available in over 40 Land Rover Experience operations around the globe. Each one provides a unique and hugely memorable adventure that you, your family and friends can all enjoy.

You'll never feel more confident behind the wheel.

ADVENTURE TRAVEL

Which destination would top your wish list of places to go on an adventure? The wide open, savagely beautiful plains of the Serengeti? Or simply exploring castles and manors around Britain? Well, you can revel in an epic adventure from the comfort and luxury of a Land Rover, assured in the meticulous planning and local insight for which Abercrombie & Kent is renowned. These two great British brands have come together to bring you a world of exploration, adventure and luxury in iconic worldwide destinations.

Each trip has a local guide and expert Land Rover instructors to provide support and guidance, ensuring you get the most out of your driving experience. Added to which, you will stay in boutique accommodation. Be part of an extraordinary journey, reimagined.

LAND ROVER GEAR

The vehicle is just the beginning.

Discover the latest collection of Land Rover Gear now available.

A meticulous attention to detail doesn't stop with our cars. You'll find the same level of craftsmanship in all of our clothing, travel items and premium gift ideas. So whether you're shopping for yourself or a loved one, you know the quality is assured.

The Land Rover collection includes ladies and gents clothing, an extensive range of small leather goods such as wallets, portfolios, iPad and iPhone cases along with briefcases and weekend bags. A range of cufflinks and ladies silk scarves add a luxury feel to the collection. There's gear for the kids, too with colourful fun clothing, caps and replica model vehicles for them to enjoy.

IMPORTANT NOTICE: Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. Whilst every effort is made to produce up to date literature, this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Distributors and Retailers are not agents of Jaguar Land Rover Limited by any express or implied undertaking or representation.

All Land Rover Approved Accessories fitted by a Land Rover Retailer within one month or 1,600 kilometres/1,000 miles (which ever occurs first) of the handover of a new registered vehicle will benefit from the same warranty terms and period of cover as the vehicle warranty. Accessories purchased outside of these parameters will be subject to a 12 month unlimited mileage warranty. All Land Rover Approved Accessories are rigorously tested to the same exacting standards as those applied to our vehicles. Performance in extreme hot and cold temperatures, corrosion resistance, impact and airbag deployment highlight some of the exhaustive product testing carried out to ensure accessories are both durable and importantly, continue to comply with current legislation. Some of the accessories featured are not available on all models. Please consult your nearest Land Rover Retailer for more information.

All our accessories are designed to be an integral part of Land Rover vehicles. While many items such as roof carriers are simple to fit, some products require specialist tools and diagnostic equipment to ensure correct integration with the vehicle structure and electrical systems. These products vary from market to market, please consult your Land Rover Retailer who will be pleased to advise you on current specifications and any query you may have.

The colours reproduced here are subject to the limitations of the printing process and may therefore vary slightly from the actual vehicle. The company reserves the right to alter or withdraw any colour finish without notice. Some of these colours may not be obtainable in your country. Please check availability of colours and current specifications with your Land Rover Retailer. Distributors and retailers are not agents of Jaguar Land Rover Limited and have absolutely no authority to bind Jaguar Land Rover Limited to any express or implied undertaking or representation.
